BAC-7302/7302C
Advanced Application Controller
for Roof Top Units

Description and application

The BAC-7302 and BAC-7302C are native BACnet, fully programmable, controllers designed for roof top unit applications. Use these versatile controllers in stand-alone environments or networked to other BACnet devices. As part of a complete facilities management system, the BAC-7302 controllers provide precise monitoring and control of connected points.

◆ BACnet MS/TP compliant
◆ Automatically assigns the MAC address and the device instance
◆ Pull-up resistors for switch contacts and other unpowered equipment. Switch selects none or 10K ohms.
◆ Supplied with programming sequences for roof top units
◆ Easy to install, simple to configure, and intuitive to program
◆ Controls fans, 2-stage heating, 2-stage cooling and an economizer
